SUMMARY

Tech Lead with 6+ years of experience delivering scalable web and mobile apps using the MERN stack with TypeScript. Proven track record leading teams, driving technical decisions, and building full-stack solutions with React, React Native, and Node.js. Experienced working cross-functionally with designers, stakeholders and distributed teams to ship high-impact products.

EXPERIENCE

Canstar

Senior Developer/Lead Developer

Brisbane, Australia

October 2024 - Present

- Led a cross-functional team of developers and testers across India and the Philippines, ensuring smooth collaboration and high-quality delivery.
- Introduced a new Git branching strategy and hosted training sessions across teams, significantly reducing merge conflicts and improving development efficiency.
- Delivered key features and integrations to support the launch of a new health insurance vertical, contributing to a \$5M revenue increase.
- Collaborated closely with [It's My Group](#) to successfully integrate external systems and launch the health insurance offering.
- Initiated ongoing brown bag sessions with interactive Kahoot quizzes to foster team learning and knowledge sharing.

Mosafe

Technical Lead/Senior Software Engineer

Brisbane, Australia

June 2022 - October 2024

- Progressed from Senior Software Engineer to Technical Lead, driving the development of scalable software solutions and leading a team of 3 developers.
- Responsible for end-to-end software development, including architect, coding, and delivery of robust applications.
- Aligned technical solutions with business goals through close collaboration with stakeholders and product owners.
- Led the transition of the React codebase to TypeScript, improving maintainability and scalability.
- Scaled the product to support thousands of concurrent users with robust architecture and performance optimizations.
- Integrated CI/CD pipelines using Jenkins to streamline deployments and improve delivery speed.

RECENT PROJECT

Solo Full-Stack Developer – [Cargo Bear](#)

- Architected and delivered a full-stack platform using MERN + TypeScript, including a React Native driver app, Next.js customer portal, and internal admin dashboard with real-time analytics.
- Integrated maps, geolocation, image capture, and push notifications to enable live delivery tracking and route management.
- Designed scalable backend services with Node.js, Express, MongoDB, and AWS (S3, SES, SNS, SQS), supporting file uploads, SMS/email notifications, and role-based access control.
- Implemented real-time updates via Socket.IO, allowing seamless communication between drivers, customers, and admins.
- Delivered the project end-to-end while collaborating directly with the CEO and designer, demonstrating product ownership and cross-functional leadership.

ADDITIONAL

FULL STACK: Typescript, Javascript, React, React Native, NextJS, ExpressJS, Kafka, BullMQ, NodeJS, MongoDB, Redis, Postgres, HTML5, CSS, Tailwind, Stylex, Ruby, Ruby on Rails

ADDITIONAL SKILLS & TOOLS: AWS, Vercel, Digital Ocean, Cloudflare, Harness, Linux (Ubuntu), Payload, Kafka,

BullMQ, Bitbucket, Github, Git, Agile Project Management Methodology, Linear, PM2
